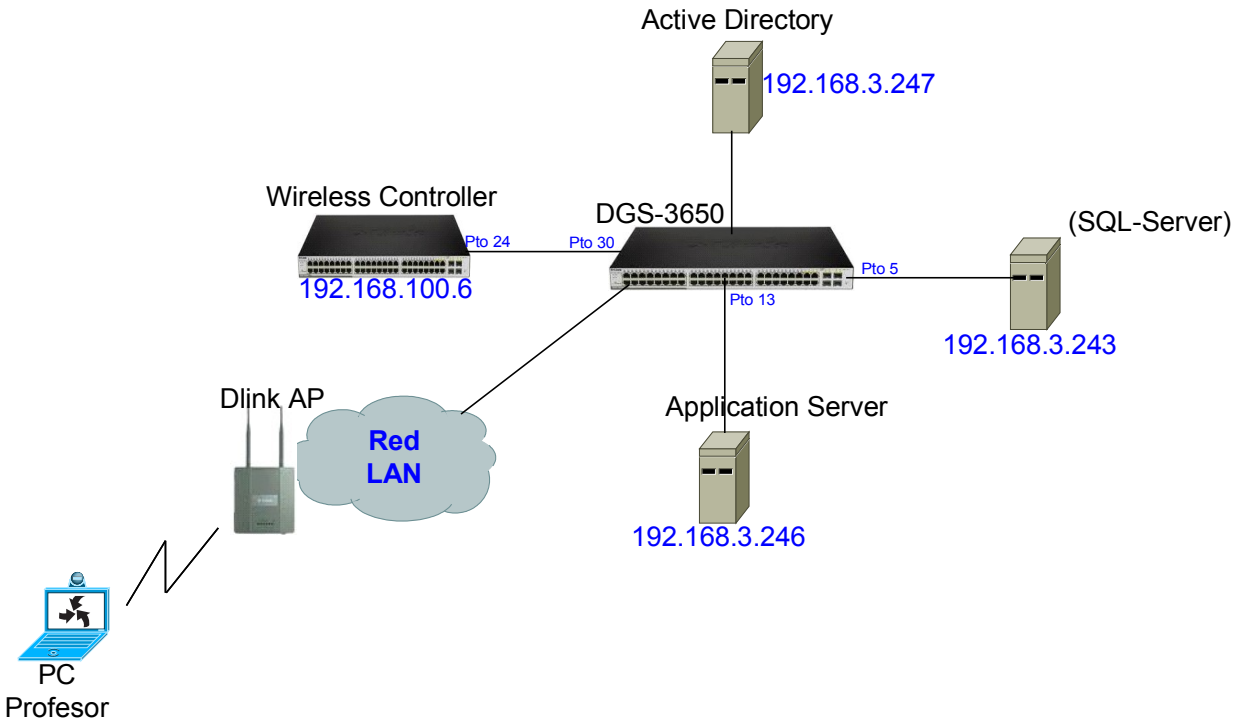
I guru of networking
Can any guru of networking can help me with this problem please.
I Attached a document where I try to document in detail the problem.
So I attached a wireshark capture too.



The problem That I observe when I review the capture in wireshark is that My laptop open a lot of communication sockets with the SQL-Server.

Address A	Port A	Address B	Port B	Packets	Bytes	Packets A->B	Bytes A->B	Packets A<-B	Bytes A<-B	Rel Start	Duration	bps A->B	bps A<-B

If Run other application, this does not happen.
When I observe the wireshark I note this communication socket lost synchronization. Why.
The same problem if I use the wired network.
